Feb 2014

Issue 5

News from Pre-4A

Last month we learned all about 'How Plants Grow'. We discussed the different parts of the plant i.e. leaf, flower petals, stem, roots and pollen! We did an experiment in the class to see how a plant grows from seeds to a plant. It was an exciting experience for the children.

Our children love to tell stories. We continue to encourage bonding between parent and child through story telling sessions. Parents, please remember to log your comments about your child's performance! Reading, reading, reading! That will be the focus over the coming months.

Themes for February

Pre-3 Seasons

Pre-4 "Healthy Me"

KG- Continents & Festival

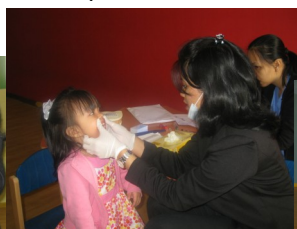

Upcoming Events

10 February- EldErtrEE Sports Day

27 February-Silly Hat Day

Dental Awareness for EldErtrEE students!

We had a dental awareness camp arranged for our children. Dr. Princy Moli George, dentist working with Family Medical Clinic physically checked each child present and did a presentation for the children on the steps to follow while cleaning their teeth. It was a informative presentation for the children. The children have promised to brush their teeth twice a day and reduce the amount of sweets they consume.

Admissions open at Al Luqta Nursery Branch

We have spaces available at our Al-Luqta Nursery Branch. The accepting age is from 2 months up to 4 years. You can contact us at 44355223.
