Cultivate Reading Habits

To enforce the reading habits among children parents have to take up the challenge at home which will be encouraged further by the teachers at EldErtrEE.

Few tips that will definitely encourage them to start reading:

- Parents should daily spend 15 minutes of reading time with their children.
- Take them to store to buy books that are attractive and appealing to them.
- Start reading with small books and build the confidence in them to retell the story.
- Acknowledge the child's progress and success in reading each day.
- Be an example-Read with your child and motivate them.
