“we are always looking to the future”

June 2013 Issue

Miss Omnia is our music teacher.

The children enjoy their time with her in music time and they get really excited.

Miss Omnia recommends Rhythmicity which is moving through music beats using different parts of the body. This is important for the children's coordination skills.

Children need to be exposed to the sunlight and fresh air for at least ten minutes every day. This will boost up their vitamin D and it will help develop their immune system.

Dolphins class, enjoyed planting their own flowers.

They learned about plants, how they grow and how we take care of them. In science, they learned about water, leaves, and how we care for our environment.

In Parrots class, the children enjoyed their sensory water play inside the class

In Caterpillars class, the children made Cards for mummy using their foot prints.

We are open in the **Summer**.

It runs from the first of July until the 29th of August. Children from the age of two months up to four years old are welcome.

We wish all of you a happy summer holiday.

For those of you who are not here for the summer, looking forward to seeing you again in September.

Welcome the new member of our family, Gianna.

Gianna is five months old. She is a cheerful little girl. She loves to interact with others. She loves music. The picture speaks for itself.
